

Warranty

INK INDUSTRY use ISO9001:2000 quality imaging supplies and guarantees that our inks and will perform to your satisfaction.

The colour gamut and UV resistance (up to 3 years without lamination) as existing mild solvent inks makes these inks an extraordinary product that matches needs of both old DX4 and DX5 Epson print heads .

Our inks models are well tested in all environments and thanks to optimized drying characteristics and dot gain control INK INDUSTRY ink are the first inks that match the requirements for enormous wide range of existing printers. New Formula Vastly increased media compatibility with low-cost self-adhesive media, and special adding make it possible to use Ink Industry inks in machines with I² wave technology.

If you are dissatisfied with the results of any of our cartridges or bottles, please return it and we will either repair the faulty cartridge / bottle or credit the full amount against a new cartridge or bottle, in exchange for the faulty cartridge or bottle.

In the unlikely event of a claim that our Ink may have caused damage to the printing mechanism of your equipment, please contact us with proof of purchase and we will provide advice or a qualified service technician to address any issues - at no cost to you.

This warranty is in addition and does not affect your statutory rights under local legislation.

We offer the most comprehensive warranty in this industry. If INK INDUSTRY is proven to have damaged your printer, we will provide parts and onsite repair service or reimburse the cost required to repair the damage.
